

Work Days

Next Workday Opportunity for the 2018 - 2019 Membership Year

There are no Scheduled Workdays

To meet your Work Day requirements and avoid being charged the \$45 work fee you must independently choose from one of the Work-Day opportunities below. There are four types of independent Work-Days:

1. **Event Volunteer**; event will be posted throughout the year. To volunteer and receive your Work Day credit contact the Event Coordinator and request to be an event volunteer. You must request and be accepted by the Event Coordinator and show-up for the event to receive your credit.
2. **Range Maintenance Days**; Range Maintenance days are scheduled throughout the year by *Match Directors* for specific range maintenance. To volunteer and receive your Work Day credit contact the Match Director of the scheduled Range Maintenance Day. You must request and be accepted by the Match Director for the specific day and show-up for the Range Maintenance day to get your work-day credit.
3. **Cyclical Work Days**; work independently on a cyclical work-day. Cyclical work-days are regular range maintenance days which occur weekly, bi-weekly and monthly. Schedule a single work-day from the posted list and schedule it with the Range Development Officer. To get your Work Day credit you must schedule your day within a range (such as week #32) with the Range Development Officer and notify the Range Development officer by email that you have completed the tasks listed in the Work Day schedule. You need work only once to receive your Work Day Credit.
4. **Independent Work Project**; Select a project from the Independent Work project list and complete the assigned tasks. Independent Work Projects may be completed without prior notification or scheduling. They are “First Come – First Serve” projects. When an Independent Work Project is complete, send an email to the Range Development Officer with an attached photo of the completed project.
